

Rösler Service

## Renewal of protective wear lining (Relining)

In order to ensure maximum service life for your equipment, we offer a lining service for work bowls (e.g., circular and trough vibrators and centrifugal and through-feed systems) as well as for wear parts.

We use only high-quality and highly wear-resistant lining materials:

- ▶ Molded polyurethane
- ▶ Spray polyurethane HD 90
- ▶ Rubber and polyurethane sheet material

### Advantages of a Rösler OEM lining:

- ▶ Environmentally friendly removal of the old liner
- ▶ Use of high-quality materials
- ▶ Extended the service life
- ▶ In-house lining service
- ▶ Assurance of consistent processing quality
- ▶ Process reliability

### Additional services

In addition to **mechanical repairs** and the **prompt availability of a lining technician** on site, we offer a unique and comprehensive service ranging from process evaluations to special repair work and complete overhauls to delivery.
